### PROFESSIONAL SUMMARY

Detail-oriented Sports Data & Video Analyst and Data Processing Specialist with 10+ years of combined experience across sports analytics, data entry, quality assurance, OCR, document processing, and data verification. Experienced in reviewing live and recorded sports footage, capturing structured play-by-play data, validating high-volume records, and identifying errors before final delivery. Comfortable working independently in remote environments, learning new platforms and workflows, and meeting strict deadlines while maintaining accuracy.

### CORE COMPETENCIES

Sports Data & Video Analysis • Play-by-Play & Event Tagging • Player / Jersey Identification • Data Entry & Verification • Quality Assurance & Error Checking • OCR & Document Processing • Spreadsheet Management • Official-Source Research & Roster Tracking • Timestamp-Based Video Indexing • High-Volume Data Processing

### TECHNICAL TOOLS

Sports & Video: Playback Review, Hudl, InStat, Krossover | Data & Productivity: Microsoft Excel, Google Sheets, Microsoft Office, Google Workspace | Collaboration: Microsoft Teams, Slack, Webmail | Workflows: OCR processing, video tagging, timestamp indexing, data QA, incident documentation

### PROFESSIONAL EXPERIENCE

#### Data Entry / Sports Analyst (Remote) — TeleworkPH | Nov 2022 - Present

- Analyze and tag live and recorded sports footage across basketball, American football, and volleyball projects using Hudl, InStat, and project-specific workflows.
- Process 500+ game events per session while capturing play-by-play actions including scoring, assists, rebounds, fouls, substitutions, penalties, turnovers, and other game-specific events.
- Perform quality-assurance reviews by cross-checking tagged events, timestamps, player information, and source footage before final submission.
- Worked across professional and amateur competitions including NBA, EuroLeague, Chinese and Japanese basketball leagues, high school and elementary basketball, volleyball, and American football.
- Collaborate remotely with trainers, analysts, and project leads while consistently meeting production targets and submission deadlines.

#### Freelance Sports Data & Video Analyst — Upwork | 2026 - Present

- Track and verify basketball game statistics and maintain organized league records across completed games and season workflows.
- Review sports footage and AI-generated tags for accuracy, including American football play classification and offensive formation review.
- Perform video/event tagging and quality assurance for dodgeball and other sports-analysis workflows using project-specific platforms.
- Identify players, jersey numbers, game events, and data inconsistencies, then correct records before delivery.
- Earned 5.0 client feedback for professionalism, accuracy, communication, attention to detail, and commitment to quality.

#### Detection Specialist — ECAM | May 2024 - Sept 2024

- Monitored two 5x5 live CCTV grids (up to 50 site views), enlarged motion-triggered cameras, and verified activity.
- Documented incidents and promptly notified assigned guards following escalation procedures.

#### Auditor / Key Entry Operator — IDCSI | Apr 2019 - Oct 2022

- Processed approximately 200 PDF/OCR air waybills daily, entering sender/receiver contacts, shipment dates, item descriptions, quantities, weights, currency/payment information, and declared values.
- Performed verification and quality checks to ensure entries were accurate, complete, and consistent with source documents.
- Reviewed unclear source text and OCR output, resolving discrepancies in a high-volume workflow.

#### Sports Indexer / Data Entry Specialist — M&M Data Processing Corp. | Nov 2016 - Mar 2019

- Indexed basketball and volleyball footage, tagging play-by-play events and timestamps.
- Performed legal-document data entry and OCR proofreading against original scanned files.
- Processed approximately 200 legal documents daily, correcting text and numeric OCR errors before saving reviewed PDFs.
